STEP 0 **Signup & Login**

Manager or HR user creates a company workspace or signs back in. Google and Apple use OAuth; the manual path captures a work email and password. Name and Company Name are captured once, at first signup, and become the tenant record.

app.teamora.io/signup

Approval Workflow

Vacancy approval policy

Controls whether a Manager must formally sign off on a Vacancy/JD inside Teamora before HR can open it for publishing. Applies org-wide; can be overridden per department later.

Require Manager approval for Vacancies

When **off** (default for most orgs), HR owns the Vacancy end-to-end — the Manager's brief, JD sign-off and scoring-matrix input are gathered offline (call, chat, email) and HR keys them in directly. No in-app approval step blocks publishing.

In-app Manager review & e-sign-off

Coming soon

Manager receives an email to review/edit the AI-drafted JD and scoring matrix and approve it with one click, with HR notified of any changes. Disabled while the toggle above is off — this is the "checks and balances" layer, planned for a later phase.

⚠ Turning approval

on will require every new Vacancy to be routed to its Manager for review before it can move to Open/Published — existing Draft Vacancies are unaffected.

STEP 0.2

HR Dashboard — Vacancy Overview

Landing screen after login. Every Vacancy the org has ever created, with its live status, pipeline size and owner — the jumping-off point into JD Management, Publishing, Screening or Interview Rounds for any one of them.

STEP 1

JD Management — Brief → Final JD → Scoring Matrix

Manager describes the role in plain language. Teamora drafts a professionally structured JD (grounded in current market phrasing) plus an AI-proposed screening scoring matrix and interview panel — both editable before the JD is frozen.

1 • BRIEF IT IN YOUR OWN WORDS

Tell Teamora about the role

Role / title

Senior Backend Engineer — Payments

Candidate profile, skills & experience (natural language)

2 • TEAMORA'S DRAFT

Senior Backend Engineer — Payments

Structured against current market JD conventions · edit inline before freezing

About the role — Own the design and reliability of our core ledger and payments

Looking for someone who's led a small backend team, strong in Node.js and Postgres, has shipped a payments or wallet system end to end, comfortable owning production incidents. 5-8 years experience, ideally from a fintech or D2C background.

Experience (yrs)

5 – 8

Target CTC (₹ LPA)

Generate final JD & scoring matrix

services...

You will — Lead a 3–4 engineer pod · design idempotent payment flows · drive on-call maturity...

You bring — 5–8 yrs backend experience · Node.js + PostgreSQL at scale · shipped a payments/wallet system...

3 · AI-GENERATED SCORING MATRIX — ADJUST BEFORE FREEZING

Screening filter for this vacancy

CRITERION	WEIGHT
Node.js + PostgreSQL production experience	35%
Payments / ledger / wallet system shipped	30%
Years of experience (5–8 target band)	20%
On-call / production-incident ownership	15%

⚠ Weights must sum to 100%. Soft-skill/behavioral traits are intentionally excluded from numeric screening — evaluated in interview rounds instead.

4 · INTERVIEW ROUNDS & PANEL

ROUND	TYPE	MANAGER
Round 1	Written / Programmatic	Auto-assigned — HackerRank pod
Round 2	Verbal — Technical	Rahul Mehta (Eng Manager)
Round 3	Verbal — Hiring Manager	Anuj Sharma (you)

STEP 4

Screening for Round 1

Every resume in this Vacancy's pipeline is scored against its frozen matrix, with each required skill marked matched, partially matched, or missing/not evident — not just a bare score. Selected/Shortlisted and Rejected candidates are split into separate tabs, always scoped to this one Vacancy.

Teamora

Submit application →

STEP 5.1

Candidate Emails & Account Setup

The three touchpoints around the Candidate Portal: the shortlist invitation that gets a candidate to sign in, the password-setup screen that follows their first sign-in, and the thank-you confirmation once they submit their checklist.

sign in to the Candidate Portal to complete a short checklist and continue your application.

Continue to Candidate Portal →

This link is unique to you and expires in 7 days.

Confirm password

.....

Or skip this and continue with Google — your Candidate Portal sign-in works with either.

Set password & continue →

reviewing your application — we'll be in touch about next steps and interview scheduling shortly.

✓ Checklist submitted · CTC, notice period & portfolio link on file · 1 document uploaded

STEP 6

Round 1 → N — Interview Tracking

Each round's manager records the outcome; the candidate moves to the next round, is placed on hold, or is dropped. Status is visible to the whole hiring team in real time.

STEP 6.1

Scheduling an Interview Round

HR (or the round's manager) schedules a round from the Kanban card — date/time, mode, venue or meeting link, and instructions for the candidate — which sends the notification email on the right.
